

# REDMOND WAY ACCESS IMPROVEMENTS

- The two-way center left-turn lane that currently exists will be replaced with strategically placed turn lanes and raised medians that will improve safety along the corridor.

- A new westbound transit and business access lane through project.

- Raised median prohibiting left-turn movements from Redmond Way to and from business driveways.

- A new signalized pedestrian crossing at 168<sup>th</sup> Avenue NE with wheelchair ramps, signing, and striping.

- An additional left-turn lane will be added to produce dual westbound lefts at Redmond Way/170<sup>th</sup> Avenue NE.

- Overhead utilities will be placed underground, and new street lights will be added along the corridor.

- Install traffic signal for improved access. Relocate driveway 100 feet to the west to improve alignment. Bear Creek Trail users will also cross at this intersection.
